Kitting & Logistics Services

Assembling, kitting and integrating efficiently can mean the difference between a successful or failed roll-out schedule.

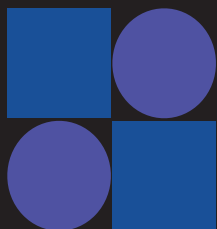

Our experienced supply chain professionals ensure that you have all the products you need to start and complete your project on time.

We use various shipping methods, including our own fleet, to economically deliver all of your equipment and material needs directly to and from the cell site, your warehouse or anywhere in between. We focus on fast and efficient turnaround times, so that your customers remain satisfied.

The NWS Advantage

- Customized kitting solutions to meet specific business needs and end customers
- Collaboration with trusted partners for seamless delivery and distribution
- Advanced technology and software for accurate tracking and inventory management
- Strategic logistics planning and optimization to lower costs and delivery times
- Efficient and streamlined warehouse operations for optimal inventory management
- Constant process evaluation to ensure continuous innovation and industry leading practices

Materials, Kitting & Logistics

Our Experience

We combine extensive industry knowledge and exceptional customer service to enable full-service supply, distribution, warehousing and logistics services for wireless and wireline deployment projects across North America. With employees and distribution centers all across North America, we can provide your business the solutions for the world we need next.
